MPHYS NOTES

## Introduction to Astrophysics and Cosmology

*Dave Scott*

*Based on a course by Prof. Tim O'Brien*

July 4, 2018

# Contents

<b>1</b>	<b>Our Place in the Universe</b>	<b>6</b>
1.1	A Tour of the Universe . . . . .	6
1.2	Putting the Universe into Scales . . . . .	6
1.2.1	Planets . . . . .	6
1.2.2	Stars . . . . .	6
1.2.3	Galaxies . . . . .	6
1.2.4	Interstellar Media . . . . .	6
<b>2</b>	<b>Observational Astronomy</b>	<b>7</b>
2.1	The Electromagnetic Spectrum . . . . .	8
2.2	Geometrical Optics . . . . .	8
2.2.1	Ray Diagrams . . . . .	8
2.2.2	Focal Length . . . . .	8
2.2.3	Magnification . . . . .	8
2.3	Diffraction . . . . .	8
2.3.1	Resolving Power . . . . .	8
2.3.2	Airy Disc . . . . .	8
2.3.3	Diffraction Limit . . . . .	8
2.4	Telescopes . . . . .	8
2.4.1	Reflecting . . . . .	8
2.4.2	Refracting . . . . .	8
2.4.3	Multi-Wavelength . . . . .	8
<b>3</b>	<b>Properties of Stars</b>	<b>9</b>
3.1	Brightness . . . . .	10
3.1.1	Luminosities . . . . .	10
3.1.2	Fluxes . . . . .	10

3.1.3	Magnitudes	10
3.2	Colours	10
3.2.1	Blackbody Radiation	10
3.2.2	The Planck Law	10
3.2.3	The Stefan-Boltzmann Law	10
3.2.4	The Wein Law	10
3.2.5	Effective Temperature	10
3.2.6	Interstellar Reddening	10
3.3	Spectral Types	10
3.4	Spectral Lines	10
3.4.1	The Bohr Model	10
3.4.2	Lyman and Balmer Series	10
3.4.3	The Doppler Effect	10
3.5	The Hertzsprung-Russell Diagram	10
3.6	The Main Sequence	10
3.6.1	Stellar Masses	10
3.6.2	Binary Systems	10
3.6.3	Kepler's Laws	10
3.6.4	Mass-Luminosity Relations	10
3.7	Distances of Stars	10
3.7.1	Parallax	10
3.7.2	Standard Candles	10
3.7.3	Period-Luminosity Relations of Cepheid Variable Stars	10
3.7.4	Main Sequence Fitting	10
3.8	Positions of Stars	10
3.8.1	Celestial Sphere	10
3.8.2	Coordinate Systems	10
3.8.3	Proper Motions	10
3.8.4	Sidereal Time	10
3.8.5	Universal Time	10
<b>4</b>	<b>The Stellar Lifecycle</b>	<b>11</b>
4.1	Energy Source	12
4.1.1	Nuclear Fusion	12
4.1.2	The P-P Chain	12
4.1.3	Triple-Alpha	12
4.1.4	The CNO Cycle	12
4.1.5	The Lifetime of the Sun	12

4.2	Solar Neutrinos . . . . .	12
4.3	Basic Stellar Structure . . . . .	12
4.3.1	Hydrostatic Equilibrium . . . . .	12
4.3.2	Equation of the State . . . . .	12
4.4	Evolution Beyond the Main Sequence . . . . .	12
4.5	Formation of the Heavy Elements . . . . .	12
4.6	Supernovae . . . . .	12
4.7	Stellar Remnants . . . . .	12
4.7.1	White Dwarfs . . . . .	12
4.7.2	Neutron Stars . . . . .	12
4.7.3	Black Holes . . . . .	12
4.7.4	Degeneracy Pressure . . . . .	12
4.7.5	Schwarzschild Radius . . . . .	12
4.7.6	Escape Velocities . . . . .	12
<b>5</b>	<b>Planets and Life in the Universe</b>	<b>13</b>
5.1	Formation of the Stars and Protoplanetary Discs . . . . .	14
5.1.1	Molecular Clouds . . . . .	14
5.1.2	Jean's Mass . . . . .	14
5.2	Contents of the Solar System . . . . .	14
5.3	Planetary and Cometary Orbits . . . . .	14
5.4	Equilibrium Temperatures . . . . .	14
5.5	Extrasolar Planets . . . . .	14
5.6	SETI . . . . .	14
<b>6</b>	<b>Galaxies</b>	<b>15</b>
6.1	Constituents of Galaxies . . . . .	16
6.2	Stellar Populations . . . . .	16
6.3	The Interstellar Medium . . . . .	16
6.4	HII Regions . . . . .	16
6.5	The 21 cm Line . . . . .	16
6.6	Spirals and Ellipticals . . . . .	16
6.7	Galactic Dynamics . . . . .	16
6.8	Galaxy Rotation Curves and Dark Matter . . . . .	16
6.9	Active Galaxies and Quasars . . . . .	16
<b>7</b>	<b>Cosmology</b>	<b>17</b>
7.1	Galaxies and the Expanding Universe . . . . .	18

7.2	Hubble's Law and the Age of the Universe . . . . .	18
7.3	The Big Bang . . . . .	18
7.4	Cosmic Microwave Background . . . . .	18
	7.4.1 Blackbody Radiation . . . . .	18
7.5	Big Bang Nucleosynthesis . . . . .	18
	7.5.1 Cosmic Abundances . . . . .	18
	7.5.2 Binding Energies . . . . .	18
	7.5.3 Matter . . . . .	18
	7.5.4 Radiation . . . . .	18
7.6	Introductory Comology . . . . .	18
	7.6.1 The Cosmological Principle . . . . .	18
	7.6.2 Homogeneity . . . . .	18
	7.6.3 Isotropy . . . . .	18
	7.6.4 Olber's Paradox . . . . .	18
7.7	Cosmological Models . . . . .	18
	7.7.1 Critical Density . . . . .	18
	7.7.2 Geometry of Space . . . . .	18
	7.7.3 The Fate of the Universe . . . . .	18
7.8	Dark Energy and the Accelerating Universe . . . . .	18

# Chapter 1

## Our Place in the Universe

### 1.1 A Tour of the Universe

### 1.2 Putting the Universe into Scales

#### 1.2.1 Planets

#### 1.2.2 Stars

#### 1.2.3 Galaxies

#### 1.2.4 Interstellar Media

# Chapter 2

## Observational Astronomy

### 2.1 The Electromagnetic Spectrum

### 2.2 Geometrical Optics

#### 2.2.1 Ray Diagrams

#### 2.2.2 Focal Length

#### 2.2.3 Magnification

### 2.3 Diffraction

#### 2.3.1 Resolving Power

#### 2.3.2 Airy Disc

#### 2.3.3 Diffraction Limit

### 2.4 Telescopes

#### 2.4.1 Reflecting

8

#### 2.4.2 Refracting

#### 2.4.3 Multi-Wavelength

# Chapter 3

## Properties of Stars

### 3.1 Brightness

#### 3.1.1 Luminosities

#### 3.1.2 Fluxes

#### 3.1.3 Magnitudes

### 3.2 Colours

#### 3.2.1 Blackbody Radiation

#### 3.2.2 The Planck Law

#### 3.2.3 The Stefan-Boltzmann Law

#### 3.2.4 The Wein Law

#### 3.2.5 Effective Temperature

#### 3.2.6 Interstellar Reddening

10

### 3.3 Spectral Types

### 3.4 Spectral Lines

# Chapter 4

## The Stellar Lifecycle

### 4.1 Energy Source

#### 4.1.1 Nuclear Fusion

#### 4.1.2 The P-P Chain

#### 4.1.3 Triple-Alpha

#### 4.1.4 The CNO Cycle

#### 4.1.5 The Lifetime of the Sun

### 4.2 Solar Neutrinos

### 4.3 Basic Stellar Structure

#### 4.3.1 Hydrostatic Equilibrium

#### 4.3.2 Equation of the State

### 4.4 Evolution Beyond<sup>2</sup>the Main Sequence

### 4.5 Formation of the Heavy Elements

### 4.6 Supernovae

# Chapter 5

## Planets and Life in the Universe

### 5.1 Formation of the Stars and Protoplanetary Discs

#### 5.1.1 Molecular Clouds

#### 5.1.2 Jean's Mass

### 5.2 Contents of the Solar System

### 5.3 Planetary and Cometary Orbits

### 5.4 Equilibrium Temperatures

### 5.5 Extrasolar Planets

### 5.6 SETI

# Chapter 6

## Galaxies

6.1 Constituents of Galaxies

6.2 Stellar Populations

6.3 The Interstellar Medium

6.4 HII Regions

6.5 The 21 cm Line

6.6 Spirals and Ellipticals

6.7 Galactic Dynamics

6.8 Galaxy Rotation Curves and Dark Matter

6.9 Active Galaxies and Quasars

# Chapter 7

## Cosmology

### 7.1 Galaxies and the Expanding Universe

### 7.2 Hubble's Law and the Age of the Universe

### 7.3 The Big Bang

### 7.4 Cosmic Microwave Background

#### 7.4.1 Blackbody Radiation

### 7.5 Big Bang Nucleosynthesis

#### 7.5.1 Cosmic Abundances

#### 7.5.2 Binding Energies

#### 7.5.3 Matter

#### 7.5.4 Radiation

18

### 7.6 Introductory Cosmology

#### 7.6.1 The Cosmological Principle
